### It's time for a vacation.

The setting for the game is a survival scenario. You've awoken on an island following a plane crash, and find yourself stranded with little resources in a dinosaur inhabited paradise. Weather the harsh conditions, collect and craft the survival tools you need, and ultimately attempt escape from the island. As quick as you can muster – “Get Away”!

### Your Goal

Build the raft to  
escape the  
island!

### Survive The Night

Craft a campfire, place it on the island, and then click it to quickly sleep through the night. This is a great way to replenish sanity, and avoid dinosaurs that crawl the island in the cover of darkness.

### Craft Weapons, Food, and More

Crafting new items from the resources you collect around the island will enable your survival. Craft an axe to chop down a tree. Craft a spear the take down a dinosaur. The possibilities are many.

### Collect Resources

Resources used to craft items can be collected from the island. Some items are commonly available everywhere, whereas others are rarer and restricted to particular climates like the jungle.

### Weapons & Tools

**Ax**  
Chop trees to get logs and other resources.

**Spear**  
Take down dinosaurs with a thrust of your spear.

**Bow & Arrow**  
Shoot at dinosaurs from afar.

**Torch**  
The night is dark, but a torch will light your way.
